ii ⁷	V ⁷	I ^{Δ7}	%
ii ⁷	bIV ^o	I ^{Δ7}	%

4.2.4 Dominant to diminished 7

Concepts:

- Borrowed chord: chord that is not built from the scale of the tonic. Examples:
 - “Picardy third”: a progression with an ending major triad instead of an expected minor triad to create an impression of resolution.
- Transistion Chords:
 - Modulation (Rick Beato):
 - * Diatonic common chord (“close” keys have many chords in common that can be used to modulate from a key to another. Common chords are called pivot chords)
 - * Chromatic pivot chord
 - * Enharmonic dominant
 - * Deceptive
 - * Enharmonic Dim7
 - * Dim7 to Dom7 (lower the root of the dim7 chord to create a dominant chord that leads to a new tonic)
 - * Chromatic Mediant
 - * Common tone (Pivot note)
 - * Direct or Linear (Abrupt change of key without preparation to “lift” the song)

* Chain Modulation ()

* Parallel modulation (Modulation of the mode but keep the same root ex: C to Cm)
